

SCHOOL PERFORMANCE DATA 2017

1. School Profile

St Joseph's Catholic Primary School is a double stream, co-educational school, catering for 490 students from Pre Kindergarten to Year 6. The school also operates a three year old program and before and after school care. In mid, 2011 a total rebuild of the St Joseph's School was completed. The new school buildings offer the students modern and outstanding facilities. The design of the new school provides extensive play areas that are safe and easily supervised. Each classroom is set up to optimise learning with shared breakout teaching space, 'Hear and Learn' sound systems and IT equipment.

While numeracy and literacy remain the school's focus, students have a broad range of experiences in all learning areas. The school has a gifted and talented program, a comprehensive sports program including numerous interschool opportunities, a swim team, involvement in the St Norbert's Music Program, computer lab, performance choirs and upper school dance program. The school has specialist teachers in the areas of Performing Arts, Information Technology, Physical Education, Library and Italian.

St Joseph's School was established in 1936 by the Mercy Order of Sisters and many of their foundation principles underpin the traditions of the school. One of these traditions is the care and concern for each and every individual of the St Joseph's Community; student, staff and parents. The school has a social worker, part time, who offers support to children or families experiencing difficulty. The school also runs the Rainbows program for children experiencing grief or loss. Gospel values of truth, justice, endurance, dignity, charity, peace and compassion remain central to our teachings and practices.

9. Annual School Improvement. Our main academic focus in 2017 was to continue to improve comprehension levels throughout the school. At St Joseph's we have many students who have English as a second language so comprehension can be increasingly challenging. Termly running records and IPI assessments are completed to track students improvement or otherwise. These assessments are showing positive growth for students and have led to healthy discussions why students have stagnated in their progression. This initiative will continue in future years to create valid longitudinal data. It was pleasing to see our NAPLAN comprehension data being above the national average. Another ASIP goal was to coordinate this information so it was easy to track growth or otherwise of students. In 2017 we created a data wall to track each student that is colour coded to easily track student growth. This has led to many constructive conversations to further improve student achievement.
